Subject : Teaching Quality Improvement Program .

Dear Sir

Please refer to the Teaching Quality Improvement Program (TeaQIP) conducted in March 2008 by you in our school and your many reminders for a feedback on its effect on the teaching-learning aspect of the school.

I want to convey my utmost appreciation about the effectiveness of this unique tool to improve the overall academic standard of the school. I must say that TeaQIP has brought in a marked change in the outlook of the teachers towards their profession and has helped a great deal in strengthening the team work between the teachers and their students.

Teachers have also expressed their gratitude for helping them to improve upon their inadequacies through TeaQIP. The Advisory Report to each teacher has not only drawn their attention towards their strengths and weaknesses but also shown them the way to improve. The positive change in the teachers' attitude is very evident.

For me as a Principal it is a tool through which I can monitor the teaching-learning process of my school very effectively. I am very confident that we would be able to also achieve good results through TeaQIP in our forthcoming Board results. With TeaQIP, I can clearly see the coming back of joy and excitement of learning among school children. Looking forward to the next round of TeaQIP soon.

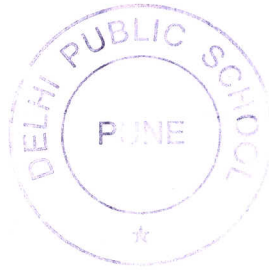

Thanking you

Yours faithfully

Neelam Chakrabarty

Dear Col Sinha,

This is in reference to the Teaching Quality Improvement Program (TeaQIP) conducted by you in our school from 29th to 31st July 2008.

Right at the outset I would like to thank you for empowering us with such an innovative tool through which we can really bring that most needed change in our school education. I have gone through all the reports of individual teachers as well as the whole school as such.

For a Principal there can't be a better way to gauge the pulse of teaching-learning process of the school. TeaQIP has indeed helped me to clearly identify the areas where we need to work harder. Now I feel much more confident of turning things around in order to make this institution into a true centre of excellence.

I must admit that after the counseling of teachers based on your Advisory Report, there has been a marked change in their attitude towards their profession as well as students. Even the students look more cheerful and feel good about the school as such. In short TeaQIP has changed the whole matrix of the teaching-learning process for the better. I wish you take this at a larger scale for the benefit of our school children and teachers of our whole country.

Before ending I would request you for your continuous support to our school in terms of conducting TeaQIP and Teachers' Training at regular intervals.

15 October 2008

Dear Col Sinha

Reference our tele conversation regarding the feedback on TeaQIP conducted in our school from 29th to 31st Aug 2008.

I would like to convey my sincere appreciation and congratulations to you for such an effective program (TeaQIP) which directly aims at improving the teaching-learning process of any school. It has helped all my teachers to overcome their drawbacks while teaching and leverage their strengths in order to enrich the learning experience of their students. TeaQIP has certainly taken the teachers to the next level of teaching excellence.

I have also interacted with many of our students regarding their views on TeaQIP. They all have felt that this program has facilitated a very frank and constructive communication between them and their teachers. They also feel that school management is genuinely interested in improving the learning conditions of the students by way of helping the teachers to improve. They also felt that they are an integral part of the school system where their views are respected and acted upon. In short, TeaQIP has redefined educational experience of our students.

From a Principal's point of view, I would like to simply say that there couldn't have been a more scientific and powerful tool through which a Principal can really keep tabs on the teaching-learning process of the school. The 'Overall School Report' accurately pin-points the areas requiring corrective action. In the end I would say that TeaQIP has the potential of creating a revolution in the field of education.

Regards
